

Yuveer Kallideen

Computer and Information Science - Graduate

Recent graduate from Monash South Africa, double majoring in Computer Networks and Security + Software development. I am an energetic person with a desire to learn and always willing to gain any relevant knowledge, skills or experience that will improve my overall ability to perform my role competently. My goal is to become a qualified software or a full stack developer as it allows me to continuously challenge myself, my inner creativity and improve my skills and knowledge.

PERSONAL PROJECTS

The Red App / Triage (02/2020 - Present)

- I am currently involved in creating an app with fellow group members to create a tele-medicine application that aims to provide the best healthcare to the disadvantaged rural population and lower-class urban population, using a modern-day digital technology platform and a telecommunication process to provide access to the best health services.
- Currently still working with the client to develop and improve the application.

Covid-19 Tracker - React (08/2021 - Present)

- I am currently developing a Covid-19 tracker with the aim of providing an easy way to find Covid-19 statistics of every country in the world by visualizing data that countries publish every day. It includes daily and total: Vaccines administered, cases, deaths and recoveries.
